Lp.	Success criterion	Evaluation	
	1.1.1 - Non-textual content		
	Does the complex graphic element have an extended description?		
	positive		
	Does meaningful information generated through style sheets have		
	an alternative available?		
	positive		
	Do film, animation and sound elements conveying information have		
	a text description explaining what they represent or relate to?		
	positive		
	Does the <; img>; element conveying information have a correctly		
	worded <;alt>; attribute?		
	positive		
	Does the decorative element <;img>; have an empty attribute		
	<;alt>;?		
1	positive Is the CAPTCHA protection digitally accessible? (Key question)	positive	
	n/a		
	Are all form fields correctly, unambiguously identified?		
	positive		
	Are there ASCII-Art type symbols on the page without a text		
	alternative?		
	n/a		
	Are downloadable documents digitally accessible?		
	positive		
	Does each graphic element have a correctly assigned textual		
	alternative?		
	positive		
	When a script changes non-textual content on a page, does it also		
	change the alternative for it?		
	not applicable		
2	1.2.1 - Audio only or video only (recording)	not applicable	
	1.2.2 - Extended subtitles (recording)	not applicable	
3	Does the film or animation containing the soundtrack have subtitles		
	for the deaf?		
	not applicable	not applicable	
	1.2.3 - Audiodescription or text alternative for media (recording) Do the film, animation and sound elements conveying the		
4	information have a text description explaining what they depict or		
4	relate to?		
	not applicable		
	1.2.5 – Audiodescription (recording)	not applicable	
5	Do films and animations have audiodescription?		
-	not applicable		
	1.3.1 - Information and Relationships	partially fulfilled	
6	Is there information on the site conveyed only by color?positive		
	is there information on the site conveyed only by color?positive		

Lp.	Success criterion	Evaluation
	Are headings defined in the page code, in the right order?	
	negative	
	Are item lists defined in the page code?	
	positive	
	Do the tables presenting data have correctly defined headers linked to the data?	
	n/a	
	Is there a table presenting data, created in a way other than table tags? n/a	
	Does the table that is the backbone of the page have a clearly defined role?	
	n/a	
	Are there data-presenting table tags in the table that is the backbone of the page?	
	n/a	
	Is the definition list structure correct?	
	negative	
	Does the meaningful information generated through style sheets have an alternative available?	
	positive	
	Are the HTML elements for triggering actions used correctly?	
	positive	
	Are citations correctly specified in the HTML code?	
	negative	
	Are all form fields correctly, uniquely identified?	
	positive	
	Are fields of similar meaning grouped in the form using <fieldset>or <optgroup>tags?</optgroup></fieldset>	
	not applicable	
	Are fields grouped by <fieldset>also accompanied by a description of the group in the <legend>tag?</legend></fieldset>	
	not applicable	
	Is a group description also added to fields grouped by <optgroup>in the <label>tag?</label></optgroup>	
	not applicable	
	Are there HTML elements in the page code for presentation?	
	negative	
	Aren't HTML elements used just to make a visual change? positive	
	Are downloadable documents available digitally?	
	positive	

Lp.	Success criterion	Evaluation
LD.	1.3.2 - Understandable order	Evaluation
7	Is there a table presenting data, created in a way other than table tags?	
	n/a Are there words on the page with letters separated by spaces?	positive
	positive Is the information on the page readable when CSS styles are disabled?	
	positive	
	Are downloadable documents available digitally? negative	
8	1.3.3 - Sensory properties Is there information conveyed on the page only through the use of position or form?	positive
	positive 1.3.4 – Orientation	
9	Can the website content be used regardless of the screen orientation (portrait/landscape)?	positive
	positive

20	3.1.2 - Language of the part	nocitivo
38	Does the foreign language content have correctly defined language? positive	positive
	3.2.1 - After receiving a focus	
	Does the context of the page change after just marking the element	
	with a focus?	
	positive	
39	Is there a mechanism to automatically redirect the page to another	
	address?	positive
	positive	
	Is the focus frame removed using a script?	
	not applicable	
	3.2.2 - During input	
	Does the context of the page change without the user explicitly	
40	approving it or being alerted to such a change?	
	positive	positive
	Are there links to bypass repeated blocks and do they work	
	consistently? positive	
	3.2.3 - Consistent navigation	
41	Is the look and function of the menu the same on all pages?	positive
4T	positive	

Lp.	Success criterion	Evaluation
	Is there repetitive content/value causing a stuttering effect on the screen reader? positive Is the function of links with the same content consistent throughout the site? positive 3.2.4 – Consistent Identity	
42	Is there repetitive content/value causing a stuttering effect on the screen reader? positive Is the function of links with the same content consistent throughout the site? positive Do repeated graphic elements always have the same text alternative? positive	positive
43	3.3.1 - Error Identification Does the error information on the form clearly describe the error, is it accessible and understandable to all users? positive	positive
44	3.3.2 Labels or instructions Are there labels next to form fields that clearly tell you what data to enter into those fields? positive Are all form fields correctly, unambiguously identified? positive Does the form field have understandable information about the format of the data to be entered and the obligation to fill in the field? positive Are fields of similar meaning grouped in the form using <fieldset>or <optgroup>tags? not applicable Are fields grouped by <fieldset>also accompanied by a description of the group in the <legend>tag? N/A</legend></fieldset></optgroup></fieldset>	partially fulfilled
45	3.3.3 - Suggestions for correcting errors Is there a hint on how to correctly enter data into incorrectly filled fields? positive	positive
46	3.3.4 - Prevention of errors (legal, financial, in data) Is it possible to verify and correct data in the form, related to legal or financial obligations, before sending it?	not applicable

Lp.	Success criterion	Evaluation
	n/a	
47	<ul> <li>4.1.1 – Code Correctness</li> <li>Are there validation errors or obsolete, unused HTML elements on the page?</li> <li>negative</li> <li>Is the DTD declaration correctly worded in the page code?</li> <li>negative</li> </ul>	negative
48	<ul> <li>4.1.2 - Name, role, value</li> <li>Are the HTML elements used to trigger the action used correctly?</li> <li>positive</li> <li>Do the frames on the page have titles?</li> <li>n/a</li> <li>Are all form fields correctly, uniquely identified?</li> <li>positive</li> <li>Are there validation errors or outdated, unused HTML elements on the page?</li> <li>negative</li> <li>Are downloadable documents digitally accessible?</li> <li>positive</li> <li>Are scripts or otherwise programmable elements accessible to assistive technologies?</li> <li>N/A</li> <li>When a script changes non-text content on a page, does it also change the alternative for it?</li> <li>n/a</li> <li>Are all dynamically generated elements accessible to assistive technologies?</li> <li>n/a</li> </ul>	partially fulfilled
49	4.1.3 – Status messages Are status or error messages available to assistive technologies without moving focus? negative	negative

LP	The address of the page where the error was detected and any sub- pages where it also occurs.	Detailed description of the error with explanations	Assigned error weight*
1.	cik.lublin.eu	<ul> <li>4.1.1 - There are validation errors or obsolete, unused HTML elements on the page; the DTD declaration is not worded correctly in the site code Explanation:</li> <li>A custom-made third-party site template does not allow certain areas to be changed.</li> </ul>	significant
2.	cik.lublin.eu	<ul> <li>2.4.6 - headings are not defined in the page code, in the correct order.</li> <li>Explanation:</li> <li>Custom-made by a third-party</li> <li>website template does not allow you to change some areas of the.</li> </ul>	significant
3.	https://cik.lublin.eu/lokalizacja/cik/	<ul> <li>4.1.3 - status or error messages are not available to assistive technologies without moving focus.</li> <li>Explanation:</li> <li>A custom-made third-party site template does not allow you to change some areas of the.</li> </ul>	insignificant

\* Weight of errors:

- crucial its presence makes it impossible to use the information or service presented on the website;
- significant its presence makes it significantly more difficult to use the information or service presented on the website;
- insignificant its presence makes it difficult but not impossible for most users with disabilities to use the information or service presented on the website.
